1 Introduction

To get the marketing authorization for a Medicinal Product, Health Supplements (Herbal, Natural, Vitamin & Minerals products) and Infant Milk & their formula in Jordan, you must register these products, this process involves filling an online application along with providing adequate information demonstrating product quality, safety & efficacy for the conditions prescribed/recommended in the proposed labeling for the product.

Striving for a faster, effective and convenient completion of the process with effective communication, JFDA developed an "electronic Drug registration Workflow System (e-JDWS)", the e-JDWS will allow the applicant to submit the on-line applications, track their status, renew and submit variations of their products.

This manual will help users to create a new account as a:

1. Local Pharmaceutical Company: Creating an account will facilitate the submission of all types of online- applications.
2. Local Drug Store: Creating an account will facilitate the submission of all types of online- applications.
3. Other local institutions/companies: Creating an account will facilitate the submission of online applications for **Herbal products** and **Infant Food & Formula**.

To market a medicinal, health supplements products(Herbal, Vitamin & minerals) and Infant milk & their formula in Jordan, you must register these products by submitting an online application and providing adequate information demonstrating product quality, safety & efficacy for the conditions prescribed/recommended in the proposed labeling for the product.

In order to simplify & speed up execution of procedures with effective communication, JFDA developed an "electronic Drug registration Workflow System (e-JDWS)" this will allow the applicant to submit on-line applications, tracking their status, also to renew and submit variations of their products.

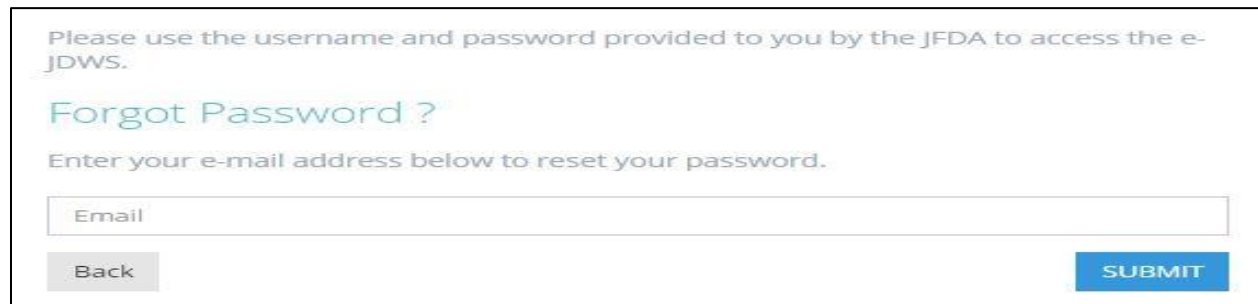

JFDA provides regulations that describe the information required for the each application, on its website www.jfda.jo Applicant can create an online account using this [link](#).
